

Thomas Karagiannopoulos

Education

Computer Science Undergraduate in Brunel University London
Expected graduation in 2023

Relevant Experience

Content management systems: Wix, Shopify

Managing charity promotional accounts: [Volunteer in promotion for my old school's fundraiser](#)

As you can see, I am pretty familiar with the role and if anything is different, I wholeheartedly believe I can adapt at an extremely fast pace.

Programming Languages

CSS/HTML

PHP/SQL

C#

Java/Python

These are my specialities, but I can pick up on new languages really quickly, while maintaining an efficient work flow

Other projects

Game Development

Web Development

App Development

All of these projects, as you can see, were big. Something that you cannot see is that they were completed on short deadlines in order for me to get used to working under pressure. Although I work excellently on a calm rhythm, I truly believe that if there is something urgent I can outperform a lot of programmers.

Languages

English: full

Greek: native
